

SEMEN ANALYSIS INSTRUCTIONS (North)

For investigation of infertility, vasectomy check or vasectomy reversal, we need you to give us a sample of semen after abstaining (no sex or masturbation) for two or three days.

Please pick up a sterile container from one of our branches and collect the sample directly into it, by masturbation. If possible, bring it to our Wollongong laboratory at 35 Denison Street, within an hour, between 8:00 am and 4:00 pm Monday to Friday. If this is not possible, please contact your nearest Southern.IML Pathology branch (they are list on the back of your request form) and arrange to drop off your sample just before a courier is due to leave for the Wollongong laboratory. If is also possible to have a sample tested on Saturday.

Keep the sample in a warm place but out of sunlight. Inside your shirt is a good place.

There is a room at our Figtree branch set aside for collection of semen samples. If you need to use this room, please call 0242-717098 to make an appointment.

Please answer the following questions before you bring your sample:

Have you recently had: (Please tick)			
<input type="checkbox"/> Investigation for Infertility ?			
<input type="checkbox"/> A vasectomy ?
