Non-Invasive Prenatal Testing

harmony[™]
PRENATAL TEST

Clear Answers to Questions that Matter

Harmony is a new DNA-based blood test that measures the risk of chromosome abnormalities from as early as 10 weeks in pregnancy.

- Unsurpassed accuracy for any age or risk
 - blinded studies in over 22,000 women of all ages
 - less than 0.1% false-positive rate for trisomy 21
- Most widely used test in over 500,000 pregnancies worldwide
- Performed from 10 weeks gestation
- May minimize invasive procedures caused by false-positive results
- Optional sex chromosome testing in singleton pregnancies
